

Description

ANSI is an alcohol based rub developed for hand disinfection. The product is suitable for use in all areas including foodcare , healthcare and for surgical disinfection.

Key Properties

ANSI is a skin disinfectant based on Ethyl alcohol 70 %. this alcohol creates a very efficient disinfectant. highly effective against resident and transient skin micro organisms, such as bacteria , fungi , E-coli , S-aureas and etc...ANSI has been formulated with a thickener to give the product a higher viscosity. the gel like properties of ANSI result in longer product skin contact time and consequently better efficacy. ANSI contains moisturiser to provide lasting skin care.

Benefits

- Contains ethyl alcohol 70 % creating a very effective disinfectant.
- Suitable for hygienic and surgical hand disinfection.
